

Ricardo Inzunza Mendivil

## PRACTICA #10. Evidencia de consulta en MySQL

### 1. Obtener el listado de todos los usuarios

The screenshot shows the phpMyAdmin web interface in a browser. The left sidebar displays the database structure, with the 'spotify' database selected. The main area shows the 'usuarios' table. A message at the top indicates that 0 rows are shown out of 1 total, with a query execution time of 0.0000 seconds. The SQL query 'SELECT \* FROM usuarios' is displayed. Below the query, there are options to 'Perfilar', 'Editar en línea', 'Editar', 'Explicar SQL', 'Crear código PHP', and 'Actualizar'. The table view shows one row with the following data:

id	nombre	correo	membresia_id
0	Ricardo Inzunza	@ricardounicornio88	0

Below the table, there are options to 'Mostrar todo', 'Número de filas: 25', and 'Filtrar filas: Buscar en esta tabla'. There are also options to 'Editar', 'Copiar', 'Borrar', and 'Exportar'. At the bottom, there is a section for 'Operaciones sobre los resultados de la consulta' with options to 'Imprimir', 'Copiar al portapapeles', 'Exportar', 'Mostrar gráfico', and 'Crear vista'. There is also a section for 'Guardar esta consulta en favoritos' with a text input field for 'Etiqueta' and a checkbox for 'Permitir que todo usuario pueda acceder a este favorito'.
